Economic Decision Making and Shopping with the 1902 Sears Roebuck & Co. Catalog

Middle School Grades, implemented for 7th grade

Stephanie Kramer

Menahga Public School District
Innovation

I developed this lesson myself four or five years ago when I first started teaching seventh grade American history. I probably ran across the idea of using an old Sears Roebuck or Montgomery Wards catalog from some lesson plan after searching on the subject of the American West. There are some lesson plans out there that suggest using the catalogs to examine what was important in the culture early in the century. For example the Michigan DNR has their "Wish Book" lesson plan that links the catalog to rural delivery. Other ones discuss using catalogs to compare advertising methods from today to the past, or writing a letter to the company ordering goods. The closest economic one I can find today suggests doing a price and wage comparison using the catalog. But no one out there had my idea of connecting the catalog to rural Great Plains settlement or homestead challenges. Originally I had my students just made a huge list of things they wanted for $100 and categorized them according to needs met. After taking the "Enhancing the Social Studies with Economic Issues" class I looked at how I could make the lesson into more of an economic lesson. The following is the result.
Overview

Economic Decision Making and Shopping with
The 1902 Sears Roebuck & Co. Catalog

This is a history lesson designed around a copy of an old Sears, Roebuck & Co. catalog. Later elementary or middle school students studying the history of the American West or the Industrial Revolution or economics could use this lesson. Students study the conditions of settling / homesteading on the Great Plains during the late 1800's and identify needs of the settlers as well as geographical constraints. Using the PACED economic model (Problem, Alternative, Criteria, Evaluation, and Decision) students plan out items they will purchase from the Sears Roebuck & Co. catalog and analyze why these are important items. Students practice economic decision making, learn about scarcity and opportunity costs, and also analyze the history of the American settler. Noticing cultural differences between back then and today by browsing the old catalog is a fun and interesting extra bit of learning!

Description of the Menahga Public School District

One of the largest buildings and businesses in the small town of Menahga is the Menahga Public School. It houses students K-12 as well as the local Early Education program. Menahga is located in north-central Minnesota and has a population, according to the 2010 census of 1,306. The community is rural and is one in a string of small to medium sized towns on US highway 71. The school district does attract quite a few students through open enrollment.

The Menahga school district has roughly 800 students in the K-12 school building. The majority of students are white, many with a Finnish background often coming from large families. The school has a very limited racial diversity. Finally, the district usually has just over 50% of its population qualifying for reduced and free meals indicating low income levels in the area. The elementary end of the school covers preschool - 6 grade and the high school is organized into grades 7-12. There is no middle school organization within the district.

Grade Level and Time Required

This lesson plan would be appropriate for middle school grades, starting with 5th grade through 8th. It takes three to four days of 50 minutes periods, depending on how much time the teacher devotes to initial reading and then time for allowed for shopping and extension activities.
Learning Objectives

- Students will identify and then summarize conditions of settling & homesteading the American West in the Great Plains region. (Geography, economic and social conditions should be reviewed.)

- Students will analyze the settlement conditions by identifying the most significant needs of settlers and then choosing the best materials to purchase out a Sears Roebuck & Co. catalog.

- Students will evaluate their choices using the PACED economic decision making model. (Problem, Alternative, Criteria, Evaluation, and Decision)

- Students will evaluate their economic decision making by discussing scarcity of resources and opportunity costs.

- Students will contrast the culture and standard of living of people living around the end of the 19th century compared to today.

Economic Concepts Covered

- Economic reasoning skills will be taught explicitly in this lesson. Students will evaluate their choices using the PACED economic decision making model. (Problem, Alternative, Criteria, Evaluation, and Decision)

- Personal and financial goals could also be taught by practicing the PACED model and applying it to a modern purchase.

- Economic resources

- Scarcity – individuals must evaluate trade-offs, make choices and incur costs.

- Opportunity costs - the cost of the next highest valued choice one must reject in making economic decisions with limited resources.

Minnesota State Economic Standards

Economic Reasoning Skills

7.2.1.1.1 People make informed economic choices by identifying their goals, interpreting and applying data, considering the short- and long-run costs and
benefits of alternative choices and revising their goals based on their analysis.

Benchmark: Apply reasoned decision-making techniques in making choices; explain why different households or groups faced with the same alternatives might make different choices.

For example: Techniques—PACED decision-making process (Problem, Alternative, Criteria, Evaluation, Decision), benefit-cost analysis, marginal analysis, consideration of sunk costs, results of behavioral economics.

* Note that the 5th grade benchmark reads: Apply a decision-making process to identify an alternative choice that could have been made for a historical event; explain the probable impact of that choice.

7.2.3.3.1 Because of scarcity individuals, organizations and governments must evaluate trade-offs, make choices and incur opportunity costs.

Benchmark: Explain how items are allocated or rationed when scarcity exists.

Materials Needed

1. Teachers will need some reading material describing the history of the settling or homesteading the American Great Plains in the late 1800's. Textbooks should work.

2. More specific articles describing in greater detail the conditions settlers faced in successfully homesteading that region. A suggested article that does a good job for that age is from Frontier House, Frontier Life Essays, "The Little Old Shanty on the Claim": Creating a Home on the Frontier, Part 1. Also on that same website look for Part 2.

3. Obviously Sears Roebuck & Co. Catalogs need to be obtained. I purchased used reproductions of the 1902 version online from various used book dealers for under $10 each. However copies can be reviewed online. Below is a site one could use to copy off selected pages (create a mini catalog of 20-30 pages for a shorter lesson) or for students to browse online.

"Catalogue No. 112. Sears, Roebuck and Company." Catalogue No. 112.:
4. An article on the significance of the Sears Catalog in rural life might be a nice addition if time allowed. Here is one online titled “Sears Catalog Brings Department Store into Home”

5. PACED economics decision making model – available in most economic textbooks. A simple version of the chart used is provided in this lesson.

6. Information on wages of the day. Handout provided from the following book:

**Procedures**

**Reading**
During a unit on the American West teachers can cover reading or lecture materials describing homesteading on the Great Plains. Textbooks usually describe the Homestead Act and associated pull factors to the Great Plains. They also describe the challenges farmers faced to be successful and should cover the climate, economic and social conditions as well as the tools settlers used to meet those conditions.

Teachers should then have students read the Frontier Life article and take notes or highlight the conditions the settlers lived in and their subsequent needs.

- Emphasize cause and effect.
- Emphasize limited resources.
- Note conditions of the Homestead Act

After a class discussion of what students summarized perhaps a final list could be tallied on the board. It might help to categorize the needs by geography/ climate, economics, farming, social life.

Introduce or review the economic concept of **scarcity**. Discuss which natural resources were limited. Are there any other limited economic resources such as
machines or tools? Human labor? Settlers very often had limited money available. So money was scarce as well as their initial supplies. Heading out west to settle in a covered wagon they had only what they could carry with them. You could emphasize that scarcity by discussing income earned by farmers at that point in history. You will also create it by limiting their shopping funds to $80. That is rather a lot for the time period but you are creating the pretend condition that the settlers start with very little and have to purchase their material possessions through the catalog. So the situation is a bit artificial for the sake of the lesson.

**Hand out the student handout for shopping using the Sears Catalog.**

*See “Step One” of the lesson for the conditions that define the Problem. (The “P” in the PACED decision model.)*

**Explain “Step Two” of the lesson which are “Alternatives” of the “A” in the PACED model. The alternatives this time are rather large, that is the Sears Roebuck, & Co. catalog. They are limited to what they can find in that book.**

At this time you may choose to put students into small groups for the rest of the lesson. Partners or groups of three are ideal for this lesson. Larger groups tend to make it hard for all participants to look at the catalog easily.

**Move onto “Step Three”** which is “Criteria.” Following the instructions on the handout students will have to review their readings and class notes to compile their list of criteria. Emphasize the concept of economic resources. Such a list should reflect some basic conditions such as:

- Dry climate but with hot summers and very cold, snowy winters
- Water is limited
- Sod house construction needed certain tools
- The Homestead Act required on small window
- Farming on the Plains needed a steel plow and what other tools?
- People were isolated and need to be self sufficient, ex. medical care
- Farmers needed some way to acquire or haul water, etc.
- Others?

At the end they are asked to select what they think are the three most important conditions to consider. Have them make a star next to those.

**Step Four** of “Evaluating Decisions” will be done out of order in this lesson. Students will do this after they go shopping!

This might be the end of day one on this project if periods are around 50
minutes. Go onto the following steps the next day.

**Step Five** for students is to go shopping using the catalog or “Decide” in the model. They pick out the items they find important, keeping in mind their $80 budget. Again, $80 is a lot of spending money for a poor settler, but we are making this pretend settler start from very little and they have to buy a lot of essential things.

They need to list the item, amount and price so they can make a grand total of costs at the end and stay within budget. Make sure they have listed their total dollars spent.

This part of the lesson is the most fun and should take up at least one 50 minute class period, maybe one and half periods. The second half of the last day should be spent on the final step.

**Return to Step Four** – Evaluate Alternatives with a chart. See the lesson handout.

Students have to review their three most important criteria. Have them put those into their charts. Review their criteria to make sure it is specific enough. “Useful” is not as good as “Provides Water” or “Successful Farming.”

Students then have to select their three most important purchases. They don’t rank them yet, just the top three as best as they can decide. Have them put those into the chart.

The teacher should model evaluating purchases using the chart to make clear how to use it correctly. Give them time to assign point values to their purchased items based on the criteria. They are ranking each choice based on one criteria at a time. At the end they total up the columns and identify which item was the most important purchase they made.

**Discussion**

Have the groups share their results and discuss why the chose what they did.

It is suggested that students will individually summarize their results using economic terms of resources, scarcity, opportunity costs and decision making. Review or introduce those concepts at this time.

- Return to the concept of scarcity and review the difficulty of making rational economic decisions. Was it hard to get everything they needed or wanted with the money budgeted? This probably will also lead to a discussion on how cheap things were back then. Teachers could use the provided handout on standard jobs and wages. Also emphasize the
natural resources available such as sod or water and how that may have
day played a role in making choices.

- Introduce the concept of opportunity cost meaning the cost of the next
  highest valued choice they had to reject. One group might have wanted
to buy $25 worth of hunting equipment or a sewing machine but had to
spend more on a windmill and pump instead for example. What sort of
value do students place on that?

- Did groups of students assess similar items as most important? What
  were the criteria they chose? Similar or dissimilar? How did that impact
  their final evaluation?

- Based on their choices are some groups more likely to be successful
  homesteaders than others?

- If one wanted to extend the economics lesson the teacher could back to
discuss economic **incentives** in the form of the Homestead Act and
cheap land. What were the economic goals behind the Homestead Act?

**Evaluation**

Collect student work: the reading summaries/ notes highlighting, the Sears
Shopping activity handout and the individual summary. These can be graded.
Again, see the Student Handout on the Sears Catalog Activity to use.

See the rubric for grading the individual summary.

A follow-up activity could be a short research project or reading on the success
rates of homesteaders during this time period and reasons for failure.
Homesteading and Economic Decision Making
What to buy from the Sears Catalog?

You are going to spend $80 to buy things from the Sears, Roebuck & Co.
Catalog in 1902. But you have to make smart choices because of limited
resources. You are not rich and you are a new settler to the Great Plains.

In economics **scarcity** is the condition that occurs because people’s wants
and needs are unlimited, while the resources to meet those are limited. So
you need to shop wisely. You will use the PACED model for deciding.
P = problem  A = alternatives  C = criteria  E = evaluate  D = decide

Consider:

STEP ONE – Define the Problem

- You are settling in the Plains region.
- You are a family of Dad, Mom, and two kids.
- You have a wagon and two oxen and things to hook them up.
- You are going to be a farmer.
- You are going to start with building a sod house.
- You all have simple clothes, & shoes but consider buying clothing
  items that are important for surviving the climate conditions.
- You don’t have to buy food or seeds for this project. Assume you have
  that.
- You have a budget of $80. (if you go over by $1 – 3 that is o.k.)

**PROBLEM** = What are you going to buy to help you survive
and increase your standard of living on your new
homestead on the Great Plains?
STEP TWO - Alternatives

Because you have a budget of $80 you cannot buy everything that would be perfect for setting up a homestead on the Plains. You have to choose from different choices or alternatives. For this project, your alternatives are limited to what is in the Sears Catalog.

STEP THREE – Criteria

How will you choose what to buy? You need some criteria or a way to judge your choices. Your life depends on choosing the correct things to buy so you must be REALISTIC.

Based your readings, notes and textbook make a list of your criteria below. Consider the conditions of the Great Plains and the conditions of homesteaders in the late 1800’s.

Now make a * next to the top three most important criteria. This ranking might help you make decisions when it comes to tough decisions.
STEP FOUR – Evaluate Alternatives
You will be doing this while you shop. Later on in this project you will show your evaluation.

STEP FIVE - Decide
Make a list of your purchases below. List the name of the item and the price. If you are going to buy more than one, multiply to get the correct total. Remember – you have an $80 spending limit!

Also windmills are not priced in the catalog - a windmill and tower would be $35.

- Index for the catalog is in the middle of the catalog.
- Some pages in the catalog have been taken out to keep it within 700 pages so you may not find something you are looking up.
Return to **STEP FOUR – Evaluate**

Choose your three most important purchases.
Fill out the grid below to demonstrate how you would evaluate them to choose the **MOST** important item to purchase.

Return to your criteria list from earlier in the assignment and use the three most important ones for this chart.
Assign each alternative a 1, 2 or 3 with 3 being most important.
Total each alternative up at the bottom to find out which purchase is the most important to you.

<table>
<thead>
<tr>
<th>Decide which alternative is assigned 1, 2 or 3 based on the criteria. 3 = most important</th>
<th>Alternative =</th>
<th>Alternative =</th>
<th>Alternative =</th>

</tbody>
</table>
Grading Rubric for Individual Summary

Student explains which economic choices they made by discussing their criteria and alternatives.

4 = detailed analysis of decision describing the criteria and their impact on choices.
3 = decision completely described and criteria connected to that decision.
2 = a brief or very general description of the decision possibly missing some of the parts of that decision.
1 = incomplete or very vague

Students used the term resources correctly

2  1
Yes  No

Student used the term scarcity correctly

2  1
Yes  No

Student used the term opportunity costs correctly

2  1
Yes  No

Student correctly discusses the history content

4 = Very clear and detailed connections made between the history of homesteading and the catalog choices. Multiple historic conditions or factors are explained or mentioned.
3 = Complete connections made between the history of homesteading and the catalog choices. Multiple historic conditions or factors are explained or mentioned.
2 = A general description of the history of homesteading used to explain choices. Few details are provided.
1 = An incomplete description of the history of homesteading used to explain choices. Few to no details provided.

Grammar

4 = complete sentences and correct punctuation and spelling
3 = complete sentences and correct punctuation and spelling with minor errors
2 = multiple errors in sentence structure, punctuation and spelling
1 = constant or continuous errors making it confusing

"I am looking rather seedy now while holding down my claim, and my victuals are not always served the best. And the mice play shyly 'round me as I settle down to rest, in my little old sod shanty in the West. The hinges are of leather and the windows have no glass, while the roof lets the howling blizzard in; and I hear the hungry ki-yote as he slinks up in the grass, 'Round my little old sod shanty on my claim. But I'm happy as a clam, on the land of Uncle Sam, in my little old sod shanty on my claim."

-- from "Little Old Sod Shanty on the Claim" (Traditional)

 Tightening a leaky faucet. Installing a ceiling fan. Caulking bathroom tile. These relatively minor home improvement projects can be daunting to many people today. Only the bravest and most experienced among us would consider constructing an entire house. Fewer still would accept the task of building a house with primitive tools, limited building resources, and little or no outside assistance. Yet for homesteaders arriving on the frontier in the latter part of the nineteenth century, building a home was the first crucial step in and securing the "free" land offered by the United States government.

The image of the frontier home that most of us have is a rustic log cabin, nestled in a peaceful mountain valley or on a sweeping green plain, adorned with patchwork quilts, butter churns, cast-iron pots, and other primitive but folksy items. But in reality, the "little house on the prairie" was often not much more than a drafty shack or a hastily scratched-out hole -- literally -- in the ground. At the end of their cramped, uncomfortable, dirty journeys to the frontier, settlers often found themselves living in cramped, uncomfortable, dirty homes. Mrs. Eva Nelson, a settler who reached Montana in the 1880s, shared the sentiment of many homesteaders when she reported, "My heart sank the first time I saw the shanty [that her husband had built]. I was terribly discouraged, and I began to
wish that we had never left home." Modern-day Americans on backcountry camping trips are often far more comfortable than homesteaders in their houses.

The provisions of the Homestead Act largely dictated frontier home design and construction. The Act mandated that, in addition to other improvements to the land, homesteaders had to build a dwelling that was at least ten by twelve feet in size, and contained at least one glass window. Since more than half of all homesteaders lost their "bet with Uncle Sam" and gave up their claims before their five-year "proving up" period was completed, it was extremely unwise -- and often impossible -- to spend a great deal of money on home construction. Frugality was a homesteader's chief concern when building a home. Settlers constructed their houses of the materials most readily -- and cheaply -- available to them. Homesteaders' houses were made to be disposable, or improvable, when and if "proving up" time ever came. Comfort was often a secondary issue.

Homesteaders frequently waited several weeks, or even months, after their arrival on the frontier to put up this semi-permanent housing. The immediate and crucial needs of obtaining food, planting crops, and filing claims forced many to continue to live in their wagons or tents long after their journeys were over.

When it came time to build, the most appealing housing option for homesteaders was, by far, the log cabin.

Its relatively easy construction, impenetrability by wind and water, and long-lasting sturdiness also made it among the most comfortable. Henry Bierman, who homesteaded in Montana in the 1880s, was astonished to visit his old cabin in 1939 and discover that "it was still standing, though badly rotted at the bottom ... the roof and the logs were still in place."

Homesteaders could often build a log cabin in a matter of days, using only an axe and auger. No nails were required for the task. The first step in construction was to build a stone or rock foundation, to keep the logs off of the ground and prevent rot. Once the foundation was laid, settlers would cut down trees and square off the logs. These logs were then "notched" in the top and bottom of each end, then stacked to form walls. The notched logs were fitted snugly together at the corners of the cabin, and this "interlocking" held the walls in place. After the logs were stacked, gaps remained in the walls, and settlers had to "chink" their cabins. "Chinking" consisted of jamming sticks and wood chips into the gaps, and then filling in the remaining space with a homemade cement of earth, sand, and water. Fireplaces were built of stone, and frequently featured stick-and-mud chimneys. Because of a scarcity of smooth board, most cabins had dirt or gravel floors, which had to be raked daily to preserve their evenness.
The typical log cabin was ten by twenty feet, regardless of the number of inhabitants. Settlers maximized their space by building lofts across the cabin roof, or lean-tos across the rear of the cabin. Typically, frontier cabins featured only one room, which served as kitchen, dining room, living room, workroom, and bedroom. It was not uncommon for a family of six to ten people to live in a single log cabin.

In the treeless lands of the plains and prairies, log cabins were out of the question. In places where a settler might have to drive sixty miles to see a single tree, homesteaders turned to the ground beneath their feet for shelter. The sod house, or "soddy," was one of the most common dwellings in the frontier west. The long, tough grasses of the plains had tight, intricate root systems, and the earth in which they were contained could be cut into flexible, yet strong, bricks.

Ground soaked by rains or melting snow was ideal for starting sod house construction. When the earth was soft and moist, homesteaders would break the soil with an ox- or horse-drawn sod cutter, which was similar to a farming plow. Sod cutters produced long, narrow strips of sod, which could then be chopped into bricks with an axe. These two- to three-foot square, four-inch thick sod bricks were then stacked to form the walls of the sod house. Soddy roofs were constructed by creating a thin layer of interlacing twigs, thin branches, and hay, which were then covered over with another layer of sod. Many sod houses were built into the sides of hills or banks, which saved time, since settlers could simply carve out a space in the hill, and build only a front wall and roof.

One 1870 Montana settler reported spending only $2.78 on the construction of his entire sod home. Soddies were also extremely cheap; one 1870 Montana settler reported spending only $2.78 on the construction of his entire sod home. However, there were several drawbacks to sod-house living. Since the house was literally built of dirt and grass, it was constantly infested with bugs, mice, snakes, and assorted other "varmints and vermin." One sod-house settler lamented that, "In the afternoons, every afternoon, the rattlesnakes would come out of their hidden dens in the walls and roof, and sun themselves on the western window-sill." The very best sod roofs tended to leak, which turned indoor dirt flooring into a quagmire. Wet roofs took days to dry out, and the enormous weight of the wet earth caused many roofs to collapse.

As a result of their extremely thick walls, soddies tended to be cool in the summer and warm in the winter.

Even in the very best weather, sod houses were plagued with problems. When the sod roof became extremely dry, dirt and grass fell like rain inside the house. One settlers' guide suggested that "an umbrella is indispensable when preparing meals in the sod home." A woman visiting friends in their frontier sod house reported:

"I had not been asleep long when I was awakened by something similar to fine hail falling on my face and hands. I called out, 'Please get a light, there is something falling on my face and hands, and all over the bed.' This aroused the lady of the house, and she remarked, 'It is only the dirt falling out of the sod which our house is made of, and when the wind blows, it gets dry, and it crumbles off. We are so used to it that it does not disturb us.' But I could not sleep, as I was afraid that the whole house would fall in on us at any moment."
As soon as homesteaders saved up enough money, many left their soddies for more pleasant quarters. Others chose to improve their soddies by layering boards on their exteriors, and giving their homes a more "settled" look. Within a few years, most abandoned soddies were completely swallowed up by the plains ... eroded by wind and rain.

When railroads reached the frontier, as they did in Montana in 1880, materials such as lumber, tar paper, and shingles were immediately available to newly arrived homesteaders. The sod house was abandoned in favor of the board-and-batten claim shanty, as it was much easier for settlers to build a frame shelter than to cut sod and stack bricks.

**Frontier Fact:**

Many settlers draped the ceilings of their sod houses with cheesecloth or muslin to catch falling debris.

Homestead shanties, like log cabins and soddies before them, were usually comprised of one (usually fairly small) room. Shanties were often built directly on the ground, with a dirt floor and no foundation. Shanty walls consisted of studs, horizontal boxing, and a layer of tarpaper held on with lath. On the windswept prairies, ceaseless winds could literally tear the walls from a shanty; if the walls held, poorly anchored shanties toppled over and blew away. Though shanties were more pleasant quarters than soddies in many ways, they were extremely difficult to heat in the winter -- and bake-oven hot in the summer. One Montana settler reported that she could "bake bread in July by placing it next to the steaming tar-paper wall."

Shanties appealed to homesteaders because of their relative portability. When families with adult or nearly adult children made multiple claims in the same area, they would move the shanty around from claim to claim as "proving up" times drew near and visits from Land Office Inspectors became imminent. When settlers married, one homesteader often took their shanty to their spouse's claim to double the size of their home. After "proving up" time, shanties were easily expanded and improved. Many buildings that started out as claim shanties remain in use throughout the plains and prairies to this day.

When Pamela Dillin Fergus reached Virginia City, Montana in 1864 after crossing the plains in a wagon train with her children, her family immediately moved into a log cabin with a sod roof, which had been constructed by her husband, James. Though the weeks of nerve-wracking travel were over, and she could sleep under a solid roof, Pamela now faced a new challenge shared by all settlers: turning her rough frontier house into a frontier home.

"I had not been asleep long when I was awakened by something similar to fine hail falling on my face and hands."

-------

4
Leaky roofs. Crumbling dirt walls. Paper-thin walls. Boggy earthen floors. Stifling heat and freezing cold. Little or no privacy. Infestation by rattlesnakes and mice. After completing the enormous task of raising four walls and a roof, homesteaders faced the equally enormous task of making their hastily-built homes livable. Faced with extremely limited resources, vital needs, and a hostile environment, settlers faced the process of "homemaking" with grim determination, ingenuity, and adaptability.

Obtaining water was, of course, a primary need for both sustaining homestead crops and the lives of the homesteaders themselves. The fastest-moving settlers staked their claims near rivers, streams, or springs, but these desirable "waterfront" homesteads quickly became unavailable. Most families had to dig wells.

Well water was usually drinkable ... initially. For the purposes of practicality, the well was usually located in close proximity to the homesteader's house. The homesteader's house was also often located in close proximity to the barn, the chicken coop, the outhouse, and the manure pile. Human and animal waste seeped into the earth, contaminating the well and making a "good cold dipperful of well water" less than appealing. Many families had to boil their well water to kill off contaminants.

Many families did not wash or rinse their dishes... so when a pioneer mother commanded her children to clean their plates, she really meant business. When well-digging failed to reach water, families were forced to collect rainwater in barrels, cisterns, and pans. While this water was not exposed to the same contaminants as the well, it was soon infested with flies and mosquitoes, and covered with a fine layer of wind-blown dust that had to be skimmed from its surface before drinking.

Because of the scarcity of water, homesteaders conserved it (and recycled it) in ways that would be unthinkable to most 21st-century Americans. It was not uncommon for an entire family to take turns and bathe in a single tub of water. Bathing itself was usually limited to once a week, and following the family baths, the filthy bathwater was then used for light cleaning or heavy laundry. To conserve even more water, many families did not wash or rinse their dishes ... so when a pioneer mother commanded her children to "clean their plates," she really meant business. In winter, melted snow supplemented the water supply.

If wells, rain, and snow did not yield an adequate amount of water, homesteaders were forced to seek out the nearest water supply and haul back barrels of water in their ox or horse drawn wagons, adding one more task to the grinding day-to-day ordeal of homestead life. One frustrated homesteader, who gave up his claim before "proving up" time came, left the following bit of doggerel posted on the door of his abandoned shanty:

"One hundred miles to water Twenty miles to wood Six inches to hell God bless our home Gone to live with the wife's folks."

SILVERWARE SET.

OUR $4.95 INITIAL SILVERWARE SET. Not made by others. We know our goods, we know you will be delighted with your purchase, and we have no fear of it being returned. Express charges will amount to next to nothing as compared with what you will save in price. The express charge will average for 500 miles, 35 cents; 1,000 miles, 50 cents; greater or less distance in proportion.

IN ADDITION TO THE 26 PIECES OF STERLING SILVER PLATEDWARE that we furnish this set we furnish the following:

1. A SOLID SILVER METAL for tableware to the pure coin silver standard, guaranteed to retain its perfect silver color and to never tarnish.
2. A SILVER COMPOSITION METAL for tableware to the pure coin silver standard, made of pure silver, and always equal to coin silver in appearance, finish and every respect.

CHRISTMAS PRESENT.

AT $4.95 WE FURNISH THIS 26-PIECE SET of initial silverware complete with case as the greatest value ever offered in this class of goods; in fact, the $4.95 price is based on the actual cost to us in immense quantities. It must be sold at a price to approximate the difference in cost, such as $2.50, which is the cost of a similar set of goods. This price is not to be exceeded.

DO NOT COMPARE THIS.

We could furnish a 26-piece set of cheap silver-plated ware with a cheap case similar to the case that is being furnished by some houses at $1.50 to $2.00, but we believe our customers want a higher grade of goods and that our customers want a higher grade of goods and that we have received so many letters of commendation for this class of goods that we have decided to increase our orders and offer the goods in sets of twenty-six pieces at even a lower price than we have ever before been able to sell the same class of goods without the case.
OUR CLOCK DEPARTMENT

NO CHARGES FOR REPAIRS ON WATCHES OR CLOCKS WILL BE ALLOWED UNLESS OUR WRITTEN CONSENT IS FIRST SECURED IN ADVANCE.

WE SELL OUR CLOCKS AT EXTREMELY LOW PRICES. It must be understood that you are buying wholesale, thereby avoiding the retailer's profit. Do not think that the shipping charges will add 20% to the price, for they are the exact cost of handling your order. We shall charge you exactly the cost of the clock, plus the exact express charges and must add no more to the cost of the clock than we sell it for. Express charges must be quoted to you before you purchase the clock year round and be convinced that we can save you from 30 to 60 per cent on clocks.

ORDER ONE OF THESE CLOCKS and if after you have examined it you do not find it in every particular as described, return it and we will cheerfully refund your money. Our terms are cash with the order.

SEARS, ROEBUCK & CO.'S SPECIAL.

FIELD GLASSES.

Our $3.95 Delmar Field Glass

No. 20950. For $3.95 we furnish this Delmar Field Glass fitted with genuine achromatic lenses, draw tubes and trimmings in a frame of solid brass, of which the body is covered in black morocco leather. The Delmar Field Glass measures 6 inches high when closed, 7 inches when extended. The object glass is 6 inches in diameter, the magnifying power 6 powers. Price, complete with leather case and strap $3.95.

$6.95 Buys a $15.00 Field Glass.

No. 20951. This Field Glass is provided with genuine achromatic lenses, draw tubes and trimmings in a frame of solid brass, of which the body is covered in black morocco leather. The Delmar Field Glass measures 6 inches high when closed, 7 inches when extended. The diameter of the object glass is 2 inches, the magnifying power 6 powers. Price, complete with leather case and strap $6.95.

Only $12.95 for Our Highest Grade Genuine Jena Special Field Glass.

No. 20960. This large illustrated advertisement by our artist direct from a photograph, will give you a clear idea of the appearance of our JENA SPECIAL FIELD GLASS. The lenses of this special glass are ground from the finest Jena optical glass, made in the Jena glass factory in Germany. These are the best made of this magnifying power 80 powers. Price, complete with case and strap $12.95.

Exceptional Value at $9.90.

No. 30852. For $9.90 Field Glass is the equal of a $25.00 field glass on the market. Absolutely high grade, serviceable field glass, it is made of the very best materials and is furnished with a magnifying power of 45 times. The lenses are 4 inches in diameter, the magnifying power 45 powers. Price, complete with case and strap $9.90.

Cordial Lemaitre Field Glass for $11.95.

No. 30852. This Fine Lemaitre Field Glass, made in the famous Lemaitre Optique Co., Paris, is offered by us at the heretofore unheard of price of $11.95, actually less than a high grade, top quality instrument of this kind. The workmanship is the best, the best high grade lenses of the Tourist Field Glass are noted for their definition and clearness; the magnifying power is 80 times. Our Tourist Field Glass measures only 4 inches high when closed, and 4 inches when extended. The draw tubes are being far less, in proportion to the size of the glass, the object glass is 6 inches in diameter, the magnifying power 80 powers. Price, complete with case and strap $11.95.

Our Special Binocular Telescope for $18.50.

An exceedingly fine and compact instrument of a superior quality. Our special Binocular Telescope weighs only 8 ounces and is admirably suited for close work. The magnifying power is 45 powers. Price, complete with case and strap $18.50.

Our JENA SPECIAL ALUMINUM FIELD GLASS. Exactly identical in appearance with the Delmar Jena Special Field Glass, except that all metal parts are made of aluminum, thus reducing the weight and adding to its handiness and portability. Price, complete with case and strap $11.95.

If by mail, postage extra, 50 cents.

If by mail, postage extra, 50 cents.
GREAT VIOLIN BARGAINS.

...OUR ENTIRE LINE OF VIOLINS...

has been carefully selected by our violin expert, who has devoted his entire life to the study of violins, and we can safely claim that we believe every instrument to be the greatest bargain ever offered at the finest value for the money which can be procured in this or any other country.

With Each Violin We Furnish Free a Nice Violin Bow, a Set of Strings and a Valuable Instruction Book.

SHIPPING WEIGHT, 7 POUNDS.

Our $2.45 Stradivarius Model.

No. 128214 Our $2.45 Stradivarius model, made of specially selected wood, beautifully varnished, reddish color, highly finished. Possesses a tone very seldom found in violins at even higher prices. Such a violin as we offer here is a real bargain everywhere at $2.45. No. 128214 Our special price $2.45

Our Special $3.45 Conservatory Violin.

No. 128214 Our Special $3.45 Conservatory Violin. This violin is modeled after the original Stradivarius violin, an instrument which is always popular and commanding. This violin is handsomely finished throughout, filled with good ebony fingerboard and tailpiece. It is reddish brown in color, beautifully shaded and handsomely polished. Do not purchase until you have seen this violin. No. 128214 Our special price $3.45

A Genuine Maggini Violin for $4.75.

No. 128216 For quality and power of tone this is one of the finest violins we have ever offered. Made of selected spruce wood, beautifully varnished, reddish brown in color, highly polished. It is trimmed with solid ebony fingerboard and tailpiece. Like the renowned Maggini violins, it has double inlaid purfling, giving it a distinguished and handsome appearance. A violin that readily sells at retail for $10.00 to $20.00. No. 128216 Our special price $4.75

Our Stainer Model for $5.65.

No. 128220 The Stainer model is much sought after by all players of the violin. This violin has best quality ebony trimming, handsomely varnished, highly polished, and well finished. A violin of the highest quality. No. 128220 Our special price $5.65

The Amati Copy for $6.35.

No. 128220 The Amati Models are notable for their especially sweet quality of tone, especially desirable for parlor playing. They are among the finest instruments known to violin players. Made of solid spruce wood, beautifully varnished, handsomely finished, with solid ebony fingerboard and tailpiece. No. 128220 Our special price $6.35

Our $6.95 Genuine Stradivarius Model.

No. 128222 These violins are made expressly for us by one of the greatest makers in Europe, and are offered at our one small percentage of profit as the great value we can offer. It has a two-piece maple back, beautifully flamed, and a two-piece maple top with solid ebony varnish, beautifully shaded to imitation of an old violin. Neck and scroll are made of solid maple to correspond with the back and sides. The fingerboard, tailpiece and pegs are of the best quality solid ebony. No. 128222 Our special price $6.95

FOR VIOLIN FURNISHINGS AND STRINGS, SEE PAGE 214.
FOR FOLIOS AND INSTRUCTION BOOKS, SEE PAGES 220 to 224.
GUITARS BEYOND COMPARISON

128602 $2.45

OUR GUITARS are made for us by one of the best manufacturing firms of guitars and mandolins in America. Every instrument is guaranteed true in scale, and is constructed with a view of obtaining both mechanical and structural tone and power. We have endeavored to furnish different styles of finish, so that each will thereby be able to please everyone. The wonderful value we are offering can be best appreciated after an inspection of the guitar on approval.

SHIPPING WEIGHT, 12 POUNDS.

WE GIVE WITH EVERY GUITAR A VALUABLE INSTRUCTION BOOK, a full set of strings and a shape of which no average person can learn to play without a teacher, and one of our celebrated Magic Capo d'Astros as illustrated and described on page 516.

THE TROUBADOUR.

THE NEW DAVIS HAMMER AND HAMMERLESS GUNS.

THE DAVIS HAMMERLESS FOR... $19.50

No. 6R130
Best quality twist barrels, choke bored, extension mated rib, double bolt, one on the lug of barrel and other across bolt through extended patent fore-end. Full pistol grip stock and checked. All parts nickel-plated. Comes with the opening of the barrels and by the action of pulling them the sear and trigger are both blocked by a positive motion, thus avoiding all danger from jarring off or prematurely pulling off, by trigger or otherwise, and is in-line mated points. Our special price... $19.50 Weight, packed for shipment, about 19 pounds.

THE DAVIS HAMMERLESS FOR... $15.75

No. 6R133
AMERICAN MACHINE MADE.
A genuine Davis Hammerless made in America, gun for 25c. This gun is guaranteed by the manufacturer to be equal in material and workmanship to any $20.00 gun on the market. The illustration is engraved from photographs and will give you some idea of the appearance of this gun. Bar reboarding action, lock and all most lock made, double bolt, one on the lug and a cross bolt on the rib, the barrels are forged, twist, double thickness over shell chamber, fine selected imported walnut stock, fancy checkered full pistol grip, fancy rubber butt plate, latest style long circular hammer, best and latest top snap break, string, long extension rib, large firing plug, case hardened mountings, stock bore.

No. 6R135 12-gauge, 30 or 32-inch barrels, 14 to 2 pounds. State length wanted. Our special price... $15.75 Weight, packed for shipment, about 14 pounds.

SEE OUR PRICES FOR LOADED SHELLS.

HOW OUR BELGIAN GUNS ARE TESTED BY THE BELGIAN GOVERNMENT.

All our Belgian guns are tested by the government of Belgium in the following manner. After the barrel are first made and before they are brand together, rounded or chamfered, they are sent to the government house where a plug is screwed into the breech of the barrel and it is loaded with 11 grains of good quality black powder and a bullet weighing 1 ounce. After the test they are brand together and tested again with 17 grains of good black powder and a bullet weighing 1 ounce. After this second test it is the final test for the boss breech, is fitted to the barrels and they are tested for the third time with 6 grains of powder and 14 ounces of shot. You will see that the test is very severe and each and every Belgium gun which we sell, from the cheapest to the best, is just as heavy as this one and, if you buy a Belgium gun of us you are sure to get a gun which has been correctly tested for Sears, Roebuck & Co., with more powder and more shot than you can possibly put into a shell. In order to put such a heavy charge into the barrel the government must load from the musket and any gun you buy from us is safe, as you will see by the foregoing rigid tests.

OUR LINE OF IMPORTED DOUBLE BARREL SHOTGUNS.

Our line of imported guns is very extensive and embraces the products of some of the best European makers. We recognize no competition in this line, and a comparison of our prices with those of other houses will convince you that we have none. We are handling only thoroughly first-class goods, guns that stand service and give the best satisfaction, and every gun we offer is warranted in every respect.

In our line of imported guns we would call your attention to our Double Breech Loader, our T. Barker, our Special Greener Action Guns, and our high-grade imported guns. We are in a position to make prices on this class of goods at least 25 cents lower than any other house, and if you will favor us with your order we know you will be so well pleased that you will not only give us your future orders, but recommend our house to your friends.

IN ORDERING SHOTGUNS you will avoid delay and annoyance both for yourself and for us by ordering by catalogue number, and state name of gun, gauge, and length of barrels with care. You will then be sure to get what you want, and exactly as you want it, for you leave nothing for us to chuse or guess.

OUR $7.45 BACK ACTION GUN.

We offer you a high-grade imported double barrel shotgun at $7.45 which cannot be duplicated elsewhere for less than $10.00 to $12.00. We import these guns direct from Europe, and you get them direct from us. You will save from 50 to 75 per cent over the retail price, 20 to 40 per cent over other house advertised prices, and far below the price you would pay for a present gun from other houses. We guarantee every gun to have barrels of best Belgian quality, or your money back.

HOW WE MAKE IT $3.98

WE OWN THE FACTORY

At which these guns are made and are therefore sold at a price the consumer can afford. The parts are cut from steel, and the whole is given the care and attention given to every other product in our line. We are able to do this because of the large factory and the skilled labor which we employ. The finished gun is subject to the same inspection as our other products, and is guaranteed to give satisfaction.

WE MAKE AND FINISH MORE BARRELS THAN ANY OTHER MAKE

We are able to do this because of the large factory and the skilled labor which we employ. The finished gun is subject to the same inspection as our other products, and is guaranteed to give satisfaction.

WE LOCATED OUR SINGLE GUN FACTORY AT WALTERTON, VIRGINIA

Here we are able to build this gun at a lower cost and charge less than any other point in the country.

ALL THIS HELPS TO MAKE POSSIBLE OUR SPECIAL $3.98 PRICE.

DETAILED DESCRIPTION.

BARREL. The barrel is made from the highest grade of steel, weathered and thoroughly tested genuine Win-

WE GUARANTEE THE WORKING PARTS

All working parts are made of the best materials and are accurately constructed to give long and trouble-free service. The gun is guaranteed to give satisfaction.

ILLUSTRATION SHOWS THE ACTION OF OUR LONG RANGE WINNER

The illustration shows the action of our gun as it is actually used. The gun is shown in the position in which it is fired, and the bullet is shown in the barrel. The trigger is shown in the position in which it is pulled, and the hammer is shown in the position in which it is cocked.

NOTE THE EJECTION

The ejection is automatic, and is accomplished by the hammer. The bullet is ejected from the barrel when the trigger is pulled, and the hammer is cocked when the gun is fired.

RUPTED AND DAMAGED GUNS.
Do not return to us a gun, revolver or rifle which is rusted, pitted or
has the finish worn off, for we have no way of selling these guns. If you
have a gun, revolver or rifle which needs repairing, first write as fully
as possible describing the article and what is wrong, and we may be able to send
you the part necessary, thus saving the express charges on the gun both ways.

designed for air rifles only, in the order of the catalogues,
the same rules as apply on the usual terms, and they cannot be returned under any circumstances.
A Few Words About Gun Wads.

There is considerable difference of opinion among shooters about the best method of loading shells with powder and shot. We have gone into this matter extensively and our experience is that if you use one cardboard wad next to the powder, then use one or two of different sizes, and then bury the powder into the length of the shell, after this put another cardboard wad next to the powder, then use powder, then put another cardboard wad next to the powder. If you use a cardboard wad next to the powder, then use two or three different sizes, and then bury the powder into the length of the shell, after this put another cardboard wad next to the powder, then use powder, then put another cardboard wad next to the powder, then use powder, then put another cardboard wad next to the powder. This is the proper way to load shells and the only way to do it is to load them.

Cardboard Wads.

Made from specially prepared cardboard.

BLACK POWDER.

Du Pont Rifle and Shotgun Black Powder.

Our Special Prices for Du Pont's Special Powders are 3/4-cental of the actual weight of the powder. Also a list of the actual weight of the powder. The actual weight of the powder is the real weight of the powder.

Du Pont's Smokeless Powder is made from the best ingredients of the world's finest black powder. The powder is made especially for us from the best grades of refined saltpetre, with or without salppetre, refined sulphur and nitro. 

Do not buy cheaper powder which gives poor performance.

July 3, 1912.

The Messrs. Du Pont & Co. are the oldest and largest powder manufacturers in the world, and have produced more of the world's finest powders than any other company. We consider their powders the best. Ever since 1802, they have been good. To illustrate, 1/2-cental is a medium amount of powder. To cut the cost of making powder, we usually buy in large lots. We always pay the same price. The actual weight of the powder is the real weight of the powder.

Absolutely no change in quality and performance, but the powder is made especially for us from the best grades of refined saltpetre, with or without salppetre, refined sulphur and nitro. 

Do not buy cheaper powder which gives poor performance.

Price for Cases, per dozen.... 1.80

KEEP YOUR CHILDREN HEALTHY and cheerful by using Castorine only. You need not have any other medicine in the house for your children. It is unquestionably the best thing you can possibly get for your little ones, especially for strep-}

rhous and vind colitis, relieves teething troubles. Cut the stomach, diarrhea, and flatulence. It assimilates the food, regulates the bowels, and relieves colic. When your baby cries give it a dose of CAS-
TROLINE. It's effect will be soothing to the child. You'll be more content to keep the house clean if you use Castorine than if you use Castoria. Castorine is the best medicine for all ailments subject to.

CASTRILINE WILL DESTROY WORMS, allay fever, prevent vomiting, biliousness, diarrhea, and flatulence. When your child has worms, give him a dose of CASTRILINE. It will straighten the bowels and make him feel better. To use, give a dose of CASTRILINE to your child every morning and after every bowel movement. It is a sure remedy for all worms. No other medicine is equal to CASTRILINE. It is the only medicine that will get rid of all worms. To use, give a dose of CASTRILINE to your child every morning and after every bowel movement. It is a sure remedy for all worms. No other medicine is equal to CASTRILINE.

Every Mother ought to have a bottle of the syrup or a box of the cakes always in the house. The syrup and the cakes are the same medicine in different forms. The syrup is more pleasant to the taste and more attractive for children. The syrup can be given to older children even though they may be benefited by using them, as green up their hair. As old is not only worm destroyers, but act as worm protectors. These remedies will give your children health and make them robust. Mothers keep your children healthy.

Reliable Worm Syrup and Worm Cakes.

Price for Cases, per dozen.... 1.80
Price for Worm Cakes, per dozen... 1.50

YOU CAN SAVE YOUR CHILDREN and in many cases save their lives. No other disease is so fatal to children as worms. Unfortu-

nately, there are many children who have worms and do not know it. Symptoms resemble those of almost every other complaint, and for this reason worms are often undetected. Worms are not only a cause of disease in them-

selves, but they also irritate and disturb the bowels of the body, which can be recognized in the stools, the improvement of health of the child, the frequent constipation, and other symptoms of worm infestation.

OUR RELIABLE WORM SYRUP effectively destroys the evil worms and removes the nastiness from which they are derived. It cleanses the stomach and bowels of all worms and removes the nastiness from which they are derived.

BLACKBERRY BALSAM is a household remedy in every home. Thousands of families will positively use this balsam as a household product because it is so effective for all ailments subject to. It is a sure remedy for all worms. No other medicine is equal to BLACKBERRY BALSAM.

Every Mother who has used it, proclaims it as the best medicine for all ailments subject to. It is a sure remedy for all worms. No other medicine is equal to BLACKBERRY BALSAM.
DYES
The Finest House-
hold Colors In the World are the Serco-
cos Stainfast Dyes.
ALL COLORS.
There are any number of household dyes on the market today, but our dyes are made in our own laboratory and are guaranteed to last. Our Serco Dyes will dye cotton, linen, silk, wool, and various fabrics. Many dollars can be saved by using these dyes, for they are cheaper. So many of the dyes on the market are not genuine, and the dye will fade or wash out. For genuine dye, Serco Dyes are the best. Many dollars can be saved by using Serco Dyes, and the results will be of the highest quality. Order now and save money. For list of colors, write for our Serco Dyes catalog.

NEW POCKET KNIVES DIRECT FROM OUR OWN FACTORY.

WE CALL YOUR ATTENTION especially to this handsome new line of highest grade American made pocket and pen knives, our Sears, Roebuck & Co. factory in New York, where the cost of production is reduced to the actual cost of material and labor, and where we make everything our one small percentage of profit. You can buy a pocket or pen knife from us at just what it costs to make in our factory, and at a price less than that of other manufacturers. We are proud to offer the finest quality knives at the lowest possible price.

TO GIVE OUR CUSTOMERS a better pocket or pen knife than we have heretofore been able to produce, we have employed a class of mechanics that insures the highest grade of work. We have succeeded in turning out a knife of better material, better finish, a more lasting knife, and at a price, quality, and less than inferior knives have been costing us heretofore.

THERE IS NO ONE knife that can compete with us in price. If you order a knife from us at 50 cents to $2.00, you will find a better made, better finished, and by far a better lasting knife than any knife you can buy anywhere at 75 cents to $3.00.

These large, clear illustrations, reproduced from life in the exact size and shape of the knives, give you a realistic appearance of the actual knives which you purchase.

SEND US YOUR ORDER for any one of these knives, and if you do not find it perfectly satisfactory, we will not ask you to return it. We guarantee this knife for a long time, and if the user is not entirely satisfied, we will replace it at our expense.

THE BLADES ARE FORGED from the best steel obtainable, and are made from the finest material. All work is done by skilled mechanics, and care is exercised in each and every stage of the operation. The blades are made in a manner that will never rust or break, and will never need sharpening.

IF A RAZOR EDGE is put on any of the knives that bear our brand, we will refund the cost of the knife. It is our policy to make the blades as strong as possible, and we guarantee that the blades will never rust or break. The blades are made from the finest material, and we guarantee that the blades will never rust or break. The blades are made from the finest material, and we guarantee that the blades will never rust or break.

ALL POCKET KNIVES should be occasionally oiled at the joint so that the blade will not wear into the spring. We advise using a good lubricant for this purpose.

**Folding Pocket Scissors.**

NEW POCKET KNIVES DIRECT FROM OUR OWN FACTORY.

EVEY KNIFE BLADE IS TEMPERED by the copper process, which we use in our factory, where the cost of production is reduced to the actual cost of material and labor, and where we make everything our one small percentage of profit. You can buy a pocket or pen knife from us at just what it costs to make in our factory, and at a price less than that of other manufacturers. We are proud to offer the finest quality knives at the lowest possible price.

WE USE 10 PER CENT GERMAN SILVER in our caps and bolsters which makes a much stronger bolt, and looks and feels much better. In fact, there is nothing better that can be used in the caps and bolsters of a knife. There is no other method of manufacturing which you can expect to get better performance. We have not yet seen any line of pocket knives in which such care was used in grinding, spacing and fitting, and the chief point, the one above all others is, that the knives we make are made to carry an edge; they will give better satisfaction in every way than any knife you have ever purchased, no matter what it was made.

WE HAVE SHAPES AND PATTERNS that will not be duplicated by any other manufacturer. We make our own patterns and shapes, and we are the only manufacturer who can make a knife to our own specifications. We guarantee our knives to be made to our specifications, and if you are not satisfied, you can return them to us for a full refund.

OUR POCKET KNIVES are fully guaranteed in every way. We guarantee the blades to be free from flaws, and we guarantee the blades to be sharp and accurate. We guarantee the blades to be made to our specifications, and if you are not satisfied, you can return them to us for a full refund.

ALL ILLUSTRATIONS SHOW EXACT SIZE AND SHAPE, being engraved directly from the original. This is the best way to make an illustration, and it is the best way to make a knife. We have tried every method of making an illustration, and we have found that the best way to make a knife is by using an engraving of the actual knife.

---

No. 28R780 Our Cheapest S., R. & Co.'s Pocket Knife. Has rosewood handle, steel lining, iron bolsters. The blade is not as heavy and strong as it should be for rough usage, but it is an excellent back knife for a boy. Price, each... ...25c

Hazel Brush Plows.

Our Prairie Breaker combines many desirable qualities. Its construction is light and strong; the workmanship is as near perfection as can be made; it turns a flat furrow with great ease and with little waste of time. It is made with solid bar share, which is superior to those formerly made of steel. Shares are made to last longer. The many desirable qualities of this plow cannot be put into words. It is a plow of the best quality made in Northern Illinois.

No. 32901 Size, 21 inches; weight, 100 pounds; complete with rolling coulter, gauge wheel and express share, Price $8.75. No. 32901 Extra share for 3 or 4 horse, Price 2.25. No. 32902 Extra for 1-inch share. Price 2.63. No. 32903 2-inch share for 3 or 4 horses. Price 2.63.

Railroad and Township Plows.

Star Gauge Wheels.

Our Star Gauge Wheels can be set as to always run straight on the plow, whether the plow is run by two or more horses, as to get the plow in or out of land. All parts are made of steel, which enables both lightness and strength. The post has a bushing both in front and rear, both of which, when worked out, can be replaced at very short notice. We have the wide variety of steel, forged out under a drop hammer. We carry a full assortment of steel, forged out under a drop hammer. We carry a full assortment of steels, forged out under a drop hammer.

Star Jointers.

Our Star Jointers are the best and most convenient jointers made. Steel is supplied with a perfect and portable jointing, and the steel portion, having three distinct characteristics, is a wonder to give as much wear as three separate and distinct types of other style joiners.

King Rolling Couthers.

For ease of agile, neatness, simplicity and durability, these couthers are the best in the world. They are well balanced and cannot break. They are the only ones that cut grass and weeds, and other grasses, in a single pass. They are made of steel and steel, or steel and steel, or steel and wood. The various parts are fitted to each other in a most exact manner, so that no part or parts can be out of order, and the machine will always work correctly.

Acme Walking Gang Plow.

In the Acme Walking Gang Plow we have the best plow ever offered for any use. What we have to say is that we want to do it. The plow is made of steel, and is so designed that it will cut weeds and grass, and any other vegetation that may be on the ground. The plow is adjustable to any desired angle, and can be fitted to any desired size. It is also adjustable to work these plows on any desired angle, and can be fitted to any desired size.

Star Rolling Couthers.

These couthers are made of steel, and are designed for rolling and cutting grass or weeds. They are adjustable to any desired angle, and can be fitted to any desired size. The various parts are fitted to each other in a most exact manner, so that no part or parts can be out of order, and the machine will always work correctly.

Kenwood Steel Frame Two-Horse Corn Planter.

This Kenwood Steel Frame Two-Horse Corn Planter is constructed entirely of steel and wrought iron, and is designed for the purpose of planting corn. It is made of steel, and is so designed that it will plant corn without injury to the seed. The planter is adjustable to any desired angle, and can be fitted to any desired size. The various parts are fitted to each other in a most exact manner, so that no part or parts can be out of order, and the machine will always work correctly.

Our $4.35 Cotton Planter.

This is a perfect, reliable and very effective cotton planter, and one which has a decided advantage over any other planter on the market. The plow is made of steel, and is so designed that it will plant cotton without injury to the seed. The planter is adjustable to any desired angle, and can be fitted to any desired size. The various parts are fitted to each other in a most exact manner, so that no part or parts can be out of order, and the machine will always work correctly.

Wing Shovel Plow.

This is an admirable plow for cutting potato and corn fields. It is made of steel, and is so designed that it will cut potato and corn fields without injury to the seed. The plow is adjustable to any desired angle, and can be fitted to any desired size. The various parts are fitted to each other in a most exact manner, so that no part or parts can be out of order, and the machine will always work correctly.

Star Rolling Couthers.

These couthers are made of steel, and are designed for cutting grass or weeds. They are adjustable to any desired angle, and can be fitted to any desired size. The various parts are fitted to each other in a most exact manner, so that no part or parts can be out of order, and the machine will always work correctly.

Tongueless Silky Plow.

This is a combination of strength and simplicity, and is designed for cutting grass or weeds. It is made of steel, and is so designed that it will cut grass or weeds without injury to the seed. The plow is adjustable to any desired angle, and can be fitted to any desired size. The various parts are fitted to each other in a most exact manner, so that no part or parts can be out of order, and the machine will always work correctly.

We can always furnish repairs for our implements at any time at the lowest prices. See notice on first page of this department.
Hand Grass Seed Stripper.

King’s Kentucky Blue Grass Seed. Just the thing for gathering grass seed. These are made of English steel, strong and durable, will last a lifetime. Twenty bushels of seed can be gathered in a day with one of these. Four men should be without one.

No. 381066 Seed Stripper, $1.50. Price.

The Little Giant Steel Bow Broadcast Hand Seeder.

With this seeder, when properly used, you can seed all wheat 60 feet to a round, flax seed 54 feet, milo 50 feet, timothy 57 feet, oats 33 feet. It will also sow rye, barley, millet, buckwheat, and any grain or seed that can be sown broadcast. This seed can be sown quickly and easily using a slight centrifugal wheel at bottom, which is often a necessity, that is resolved rapidly in opposite directions by means of the bow, scattering the seed with great velocity. Weight, 8 lbs. No. 381065 Bow Sower. Price...85c.

Acme Patent Corn Binder.

The Acme comprises a solid malleable iron frame to which the various parts are attached, and which frame is therefore absolutely unbreakable. It is designed to get out of order as little as possible. It is a hand seed sower for use on any other machine. A great feature of this machine is that the binder can be used either on the right or left side of the machine. It is made on a narrow, wooden one-sided frame, and not used on any other machine. It will sow rye, oats, barley, flax, millet, sunflower seed, corn, and all kinds of seed. It is made for use on any other machine. It will sow rye, oats, barley, flax, millet, sunflower seed, corn, and all kinds of seed. It is made for use on any other machine. It will sow rye, oats, barley, flax, millet, sunflower seed, corn, and all kinds of seed. It is made for use on any other machine. It will sow rye, oats, barley, flax, millet, sunflower seed, corn, and all kinds of seed. It is made for use on any other machine.

No. 381082 Acme Corn Binder. Price...75c.

Potato Planters.

These potato planters can be planted better and cheaper than by any other machine. They are simple, strong, and easy to operate. The density of the holes made, made (dropped) and covered. Plants uniformly spaced (covered) in the same manner. The potato planter is designed to be used on the pipe, enclosed in a box, which therefore gives the plant a fair start to the growth.

No. 381067 Potato Planter. Price, $1.75.

Segment Corn and Bean Planter.

This is a perfect one-hand corn and bean planter. It is extremely accurate. The slide is a standard of the machine. The handle is pivoted to another machine. There is a knob on the side of the handle, which the slide is a part of the rim. The slide is fastened to the handle with four screws, one of these being the pivot. The slide is fastened to the handle with four screws, one of these being the pivot. The slide is fastened to the handle with four screws, one of these being the pivot. The slide is fastened to the handle with four screws, one of these being the pivot.

No. 381069 Segment Planter. Price...95c.

Our Wheelbarrow Grass Seeders.

Our New Cenwood Grass Seeders are now on exhibit all over the country, and are being put up by experienced workmen out of good material. They are made strong, light, and will sow all seeds evenly and accurately. Every farmer has many improvements over anything else in the market. They are now being used on long shipments. Weight, packed for shipment, 50 pounds. No. 381062 15-Foot Wheelbarrow Seeder. Price...$5.00.

No. 381066 14-Foot Wheelbarrow. Price...$3.75.

No. 381076 12-Foot Wheelbarrow. Price...$2.30.

Harvester Canvas Tensioners.

The Sears, Roebuck & Co.’s Iron Mower.

Our Wheelbarrow Grass Seeders are now on exhibit all over the country, and are being put up by experienced workmen out of good material. They are made strong, light, and will sow all seeds evenly and accurately. Every farmer has many improvements over anything else in the market. They are now being used on long shipments. Weight, packed for shipment, 50 pounds. No. 381062 15-Foot Wheelbarrow Seeder. Price...$5.00.

No. 381066 14-Foot Wheelbarrow. Price...$3.75.

No. 381076 12-Foot Wheelbarrow. Price...$2.30.

Triumph Corn Planter.

One man can do the work of two with our Triumph Corn Compressor. No farmer can afford to be without one today. Just simply place the supporting hook in shock as shown, then pull the long handle through the loop in the supporting hook. Take the end of the rope away from the shock, and use it to the wire and walk around the shock. Place the ring on the corn compressors, then pull on the rope of the rope until the rope is drawn tight as you wish. Then by drawing a rope away from the shock, the compressor will work, the rope and wire, which is then a very simple task.

No. 381080 Corn Shock Compressor. Price...60c.

Triumph Corn Planter.

Triumph Hand Corn Planters are adapted to all sorts of soil, never clog, and the operator can see that the design is simple. They are the most durable planters on the market, all parts are made of steel. They can be used on sod or plowed ground. Weight, 40 pounds. No. 381097 Triumph Planter. Price...$5.00.

The Eclipse Hand Corn Binder.

The Eclipse Hand Binder has given unequalled satisfaction for some time. It is simple and works much easier than other styles. Weight, 8 pounds. No. 381100 Eclipse Hand Binder. Price...$7.00.

The Eclipse Co.’s Plow has given unequalled satisfaction for several seasons. It is simple and works much easier than other styles. Weight, 8 pounds. No. 381115 Canvas Tensioner. Price...$6.00.

The Sears, Roebuck & Co.’s Iron Mower.

Our Wheelbarrow Grass Seeders are now on exhibit all over the country, and are being put up by experienced workmen out of good material. FOR ONLY
$10.45
20-YEAR GUARANTEED, 5-DRAWER, DROP HEAD CABINET, NEW QUEEN SEWING MACHINE,
THE LOWEST PRICE ON A HIGH GRADE
SEWING MACHINE EVER ATTEMPTED.
THE MACHINE WEIGHS...

IF YOUR HOME DEALER
or agent is trying to sell you a
Sewing Machine at $30.00 to
$50.00, or if you have been offered
a Sewing machine by any catalogue
or mail order house at any price
approaching our special $10.45 price for the NEW QUEEN SEWING
MACHINE, we are sure that before you place your order elsewhere, you see
and examine one of these machines in your own
vicinity, possibly some of your friends or relatives are using a New
Queen machine, write us and we will give you the names of people
in your own neighborhood who have bought from us and are now using the
New Queen, this special $10.45 drop cabinet sewing machines. So,
unless you order direct from our catalogue, before buying from any
other house, please let us give you the names of people who are using
this machine, they are your own neighbors. They will tell you
how much better it is than any of the many cheap machines on the
market. They will tell you how very satisfactory it is and how
much money they saved by buying from us.

WE ARE SELLING SUCH A HIGH GRADE OF SEWING MACHINES
and at prices so much lower than other houses, and our sewing machines are
giving complete satisfaction, and they are used so well known in every
community (on an average over 200 of these machines are being used in every community in the
United States), that no one need feel to us for a sewing machine until they have
seen and examined our machines in their own neighborhood and learned from the
people who are using them whether or not you can get them, better value for your money
than less can possibly get elsewhere.

SELLING MORE MACHINES... than all other mail order houses combined, more
in this country, our machines have been wonderfully improved, so the quality, greatly
reduced cost, and by doing away with all advertising expanse, getting 50 cents for
most of our big catalogue, getting cash in full with orders for all sewing machines, we
do not exceed our expense of handling to the very minimum and give you the benefit in the
lowest price ever quoted for a strictly high grade machine, and all we ask of you
before ordering is that you see the people in your neighborhood with our own
machines, if from their own experience they have not gotten from us a better machine
than they could possibly get anywhere else.

THE NEW QUEEN HEAD is one of the best high arm heads made. It has all the
latest improvements, all the up to date parts. Patents for tension feed, self threading, vibrating shuttle, automatic bobbin winder, adjustable
needle, patent tension lifter, improved shuttle, improved shuttle carriage, patent needle box, patent thread guard, patent bolt
controller. The head is handsomely decorated and ornamental, full nickel plated
finish, black enamel hands, handsome colored transfer ornaments, beautiful
nickel trimmings throughout.

MAKE UP AN ORDER of 100 pounds in weight. REFER TO OUR COMPLETE GROcery DEPARTMENT pages 14 to 23, and include some goods in this line, SUGAR, COFFEE, TEA, etc.
Acme Western Coal Range.
WITH RESERVOIR AND HIGH SHELF.

Acme Woodland Wood Range.
WITH RESERVOIR AND HIGH SHELF.

FOR WOOD ONLY.

STOVE REPAIRS.

PLEASE NOTICE: We can always furnish reefing parts for Acme stoves. In ordering reefing parts, please give your purchase Invoice Number or the most complete description of your stove, so that we may furnish the correct parts. Stoves are built to order, and our prices are fixed, which may be altered at our discretion. For the best results, please use the Acme Western stove, as it is especially recommended to those who wish to burn wood, and as a better range to buy than a combination coal and wood burner.

FOR WOOD ONLY.
$9.54 Buys the NEW MODEL COAL AND WOOD PRINCESS RESERVOIR COOK STOVE.

AT $9.54  in the smallest size and $10.95 in the popular 8-18 size (in a big reduction from all previous quotations), we will dispose of our surplus stock of high grade Princess cook stoves. When our supply is disposed of no more of these stoves can be had at the price. We want, therefore, advise you to place your order at once.

UNDERSTAND, we guarantee the stove to reach you in perfect condition and please you or we will immediately return your money, and in the years to come you can always get castings from us for repairs and at a very low cost to you.

THIS STOVE is made in our own foundry in Northern Ohio from the best material that can be procured. From the illustration, engraved from a photograph, you can form some idea of the appearance of this handsome reservoir cook stove.

THE ACME PRINCESS burns hard coal, soft coal, coke, wood, or anything for fuel. It is made with large fire, cut tops, heavy cut centers supported by posts, heavy covers, heavy linings with very heavy sectional fire back, large bailed ash pit, open door, kickers, nickel plated pans on open door, nickel plated door, nickel heavy tinned oven door. When ashes are removed from under oven they are scraped into the hearth, avoiding all possibility of spilling ashes on the floor when cleaning the stove.

THE ACME PRINCESS being furnished with a lift, shaker, and scraper, for removing ashes from under the oven. It is fitted with a large porcelain lined reservoir, as shown in the illustration, and is furnished on a large handsome rock pattern base. It has very few at date feature of every high grade reservoir cook stove, every improvement up to date, and is one of the best reservoir cook stoves on the market.

Until our surplus stock is disposed of we will furnish the Acme Princess in the following sizes at the special cut prices named:

Jet Black Curly Dog Coat

For $20.00.

we do not recommend the ordinary plain dog coats. While they wear and give satisfaction, we do not like them as a reference, as we can furnish coats that will wear as well or better, that will look to one much dressier, that we advocate buying a fine appearing fur coat. While this coat is a designer coat, it does not resemble the ordinary plain dog coats any closer than our black Galloway coat does a common goscin. This coat is made from jet black, glossy curly dogskin, carefully selected, evenly matched, thoroughly de-haired one of the handsomest and best wearing coats in our line, and the kind of a dog coat that we do recommend. Made perfectly plain, collar and sleeves quilted Italian lined, duck interlined, leather arm shields, loops and buttons. Guaranteed for one year.

No. 41R306 Price.............$20.00

Good Fur Coats Are Hard to Find...

There are so many made up to sell and not to wear.

That's why it pays to order one of our guaranteed coats.

Our $22.50 Natural Black Bearskin Coat.

No. 41R308

This, our most popular coat last season at $24.00, we have reduced to $23.50 because we have saved just $3.00 by making five times the quantity, and therefore give our customers the benefit. This is same grade of coat which we sold so many of last season, made from heavy jet black bearskin, very closely farmed. Quilted (tail) lined, leather arm shields, saved throughout with heavy linings, warrant not to rip. Duck interlined. Better this year than ever, and the price is less

No. 41R308 Price...........$23.50

A FUR COAT CAN BE A DRESS COAT AS WELL AS A FUR COAT IF YOU GET THE RIGHT KIND. Our fur coats can be worn as a dress coat or place with every satisfaction to the wearer.

Jet Black Russian Buffalo Calf Coat for $25.00

No more popular coat in our line than the Buffalo. Don't pay $10.00 more for an inferior fur coat. Our price is $10.00 less than last season, but the coat is even better. The price we make is less than many small manufacturers can produce a similar garment. Made from jet black, glossy Russian buffalo calf, best selected stock, southern beaver collar, cuffs and trimmings, button loops and loops, quilted Italian lined, duck interlined, guaranteed for wear, appearance, workmanship, warmth, style and finish.

No. 41R310 Price.............$25.00

Seal Coat

Our $25.00

very handsome jet black coat, made from first quality hair seal.

Dressing, Tanning the Skins and Making them Up in our own Factory, we are able to offer a Genuine Hair Seal Coat at about one-half the usual price.

Made from jet black first quality hair seal. Very glossy, and presents a fine appearance, illustration will show. Full southern beaver collar, rolling cuffs and pocket tabs, tucked loops and laces, leather arm shields, quilted Italian lined, duck interlined, edges bound with black worsted. No more stylish or desirable coat in our line than this number.

No. 41R312 Price.............$35.00

Why Our Fur Coats at Our Prices Are Better

Then fur coats sold by other houses at higher prices, is all a question of economy in buying the skins, making the coats, and one small margin of profit above the actual cost of manufacture.

The Fur Coats you buy from Home Storekeepers have passed through at least three hands with three profits, any one of them much larger than our one small profit.

...READ PAGE II46 ...

How our Fur Overcoats are made, how we guarantee to satisfy you or refund all your money and pay express charges both ways.

If every fur coat we send out wouldn't advertise us we would want to quit the business.

Our $32.50 First Quality Norway Seal Coat.

This, the handsomest black coat in our entire line, and a coat that we can especially recommend, one which we sold hundreds of last season.

They were all guaranteed for one year from date of sale.

...YET WE NEVER RECEIVED A COMPLAINT FROM OUR NORWAY SEAL GOOD.

We claim that this coat, as our last year's price, $32.50, is the finest fur coat ever offered the trade. We have made it up this season exactly the same as illustration will show. Our full size, has a large, rolling, genuine outer collar. Also genuine outer cuffs and pocket tabs, worsted loops and laces. Extra quality of black Italian rolled lining, leather arm stays, waterproof deep interlined. While the price of this coat remains the same as last season, we are using genuine outer collar and cuffs for trimming, which makes it a much finer coat than our last year's garment. We especially recommend this number for all kinds of weather. It is a favorite with doctors, lawyers, or any one wishing a very handsome, at the same time splendid-looking coat.

No. 41R314 Price.............$33.50

No. 41R314
STEP THREE – Criteria

How will you choose what to buy? You need some criteria to narrow down your choices. Your life depends on choosing the correct items so your criteria must be REALISTIC.

Based on your readings, notes and textbook make a list of requirements. Consider the conditions of the Great Plains and the conditions of the early homesteaders in the late 1800’s.

- Plains and prairies/grass/no trees
- Water/dig a well/conservate water
- House/ glass window
- Snakes/mice/locusts
- Windy/get windmills
- Really cold in winter/deep snow
- Hot in summer
- Plow/Pot and Pan/ax/Shanties/wood
- Make a lot of things

Criteria

1. Climate – Geography
2. Homestead art requirements
3. Farming conditions/land etc.
   Windmill = $35

Now make a * next to the top three most important criteria. This ranking might help you make decisions when it comes to tough decisions.
STEP FOUR – Evaluate Alternatives
You will be doing this while you shop. Later on in this project you will show your evaluation.

STEP FIVE – Decide
Make a list of your purchases below. List the name of the item and the price. If you are going to buy more than one, multiply to get the correct total. Remember – you have an $80 spending limit!

Also windmills are not priced in the catalog - a windmill and tower would be $35.
- Index for the catalog is in the middle of the catalog.
- Some pages in the catalog have been taken out to keep it within 700 pages so you may not find something you are looking up.

Window = $5.15
Flobert 71.00
"Waterland" spades = 95c
Acme Prairie plow = $91.85
Lantern = 63c
Wood stove = $5.14
Dishwasher = $4.25

Windmill = $3.50

Long Johns = 29¢ x 2
Mens Wool clothes = 135c
Dress = 98¢
Gull coat = 3.98
Ice set = $2.22

Sissors = 40¢
Dairy bucket = 38c

67.57 66.57 67.92 72.80 69.46 71.68 72.08 72.46
Return to STEP FOUR – Evaluate

Choose your three most important purchases. Fill out the grid below to demonstrate how you would evaluate them to choose the MOST important item to purchase.

Return to your criteria list from earlier in the assignment and use the three most important ones for this chart.

Assign each alternative a 1, 2 & 3 for with 3 being most important. Total each alternative up at the bottom to find out which purchase is the most important to you.

<table>
<thead>
<tr>

STEP THREE – Criteria

How will you choose what to buy? You need some criteria or a way to judge your choices. Your life depends on choosing the correct things to buy so you must be REALISTIC.

Based your readings, notes and textbook make a list of your criteria below. Consider the conditions of the Great Plains and the conditions of homesteaders in the late 1800’s.

- Must have house - Window
- trees
- water - boil - dig - rain - river
- climate - prairie - plains - grass - no trees - no wood.
- farming conditions
- snakes, mice, locusts.
- windy - windmill
- cold - winter - warm summer
- winter lots of snow.
- tools - plow - axe - scy, cutter - wood - tar paper - tar
- farm

Now make a * next to the top three most important criteria. This ranking might help you make decisions when it comes to tough decisions.
STEP FOUR – Evaluate Alternatives
You will be doing this while you shop. Later on in this project you will show your evaluation.

STEP FIVE – Decide
Make a list of your purchases below. List the name of the item and the price. If you are going to buy more than one, multiply to get the correct total. Remember – you have an $80 spending limit!

Also windmills are not priced in the catalog - a windmill and tower would be $35.

- Index for the catalog is in the middle of the catalog.
- Some pages in the catalog have been taken out to keep it within 700 pages so you may not find something you are looking up.

windmill - 35¢
window - 5.15
5lb. axe - 44¢
5lb. axe handle - 94¢
495 knife - 3.04
305 shotgun - 3.98
322 shells - 1.80
118 clock - 1.30
695 lantern - 4.76
678 steel plow - 2.03
1008 4 pairs of gloves - 1.32
1017 4 hats - 2.00
537 tool set - 2.22
983 winter underwear - 78¢
984 2 boys' under pants - 70¢
582 2 pots - 66¢
562 2 paint - 66¢

817 stove - 5.14
653 bath tub - 5.00

10.91
Return to STEP FOUR – Evaluate

Choose your three most important purchases.
Fill out the grid below to demonstrate how you would evaluate them to choose the MOST important item to purchase.

Return to your criteria list from earlier in the assignment and use the three most important ones for this chart.

Assign each alternative a 1, 2 & 3 for with 3 being most important.
Total each alternative up at the bottom to find out which purchase is the most important to you.

<table>
<thead>
<tr>
<th>Decide which alternative is assigned 1, 2 or 3 based on the criteria. 3 = most important</th>
<th>Alternative = stove</th>
<th>Alternative = plow</th>
<th>Alternative = windmill</th>
</tr>
